There are cookies that are only kept for a particular session, or they are stored on your device for a defined period of time.

Cookies may be placed by the server of the website you are visiting or by a partner, with which this website cooperates. The website's server can only read the cookies it has placed itself. It has no access to other information located on your computer or mobile device.

Cookies can be placed either by the controller itself ("first-party cookies") or by a third party as a service provider for the controller ("third-party cookies").

These cookies track your online activity to help advertisers display more relevant ads or limit how often you see an ad. These cookies have a lifetime of up to 24 months and are set by third-party vendors.
